Subject: RE: NM CEC Caulking PCB Data

Mr. Zarba:

By letter dated April 27, 2017, the Town submitted the PCB results for the sand pits at the CEC site.

Subsequently, on May 18th the Town and its consultants had a conference call with EPA and CTDEEP to discuss these results as well as EPA's comments on the structural steel currently located on the property.

Was there some follow-up you were to do re: the sand? I just wanted to confirm that there is nothing else we owe you at this time.

Subject: Fwd: NM CEC Caulking PCB Data

Kim:

See e-mail below from Ed - he was able to find the information you had requested on the caulking.

Take Care,

Michael F. Zarba, P.E.
